Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE *3* MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1)☒ Responsive to communication(s) filed on *06 December 2007*.

2a)☐ This action is **FINAL**. 2b)☒ This action is non-final.

3)☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

4)☒ Claim(s) *1,3 and 5-10* is/are pending in the application.

4a) Of the above claim(s) _____ is/are withdrawn from consideration.

5)☐ Claim(s) _____ is/are allowed.

6)☒ Claim(s) *1,3 and 5-10* is/are rejected.

7)☐ Claim(s) _____ is/are objected to.

8)☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

9)☐ The specification is objected to by the Examiner.

10)☐ The drawing(s) filed on _____ is/are: a)☐ accepted or b)☐ objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).

Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).

11)☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

12)☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).

a)☐ All b)☐ Some * c)☐ None of:

1.☐ Certified copies of the priority documents have been received.

2.☐ Certified copies of the priority documents have been received in Application No. _____.

3.☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/6/07 has been entered.

Receipt is acknowledged of amendment, remarks filed on 12/6/07. Claims 1, 3 and 5-10 are pending in the application and the status of the application is as follows:

Claim Rejections - 35 USC § 112

2. Claims 1, 3 and 5-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. **This is new matter rejection**.

3. There is no support for the expression "a topically acceptable carrier for application to the skin and for assisting in maintaining a pH of the composition from about 4.5 to 9, wherein the carrier includes … neutralizer".

4. The support is for "pH of the composition from about 4.5 to about 9". See below for paragraph 26.

5. *"Desirably, the carrier is capable of assisting in maintaining the desired pH of the composition. The pH values for the compositions of the present invention are from about 4.5 to about 9, preferably from 4.8 to 8.2, and more preferably from 5.6 to 7.9".*

6. Claims 1, 3 and 5-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. **This is written description rejection**.

7. To overcome the 102 (b) rejection over PGPUB US 2004/0097472, applicants amended the claim to recite that the carrier includes "at least one neutralizer" and point out to table 5 for the support. Table 5 recites "neutralizers" but the instant specification does not describe "neutralizers".

This is a "written description" rejection, rather than an enablement rejection under 35 U.S.C. 112, first paragraph. *Vas-Cath Inc. V. Mahurka*, 19 USPQ2d 1111, states that applicant must convey with reasonable clarity to those skilled in the art that, as of the filing date sought, he or she was in possession of the invention. The invention, for purposes of the "written description" inquiry is *"whatever is now claimed"* (see page 1117).

A review of the language of the claim indicates that these claims are drawn to a composition, wherein the carrier includes, *i.e.*, "at least one neutralizer".

A description of a genus may be achieved by means of a recitation of a representative number of species falling within the scope of the genus or of a recitation of structural features common to the members of the genus, which features constitute a substantial portion of the

genus. *Regents of the University of California v. Eli Lilly & Co.*, 119 F3d 1559, 1569, 43 USPQ2d 1398, 1406 (Fed. Cir. 1997).

The disclosure of a single disclosed species may provide an adequate written description of a genus when the species disclosed is representative of the genus. One of skill in the art would not recognize from the disclosure that the applicant was in possession of the genus drawn to "a composition for enhancing the rate of mammalian skin exfoliation… wherein the carrier includes tetra sodium EDTA and at least one neutralizer". The courts have stated:

The description requirement of the patent statue requires a description of an invention, not an indication of a result that one might achieve if one made that invention. See *In re Wilder* 736 F.2d 1516, 1521, 222 USPQ 369, 372-373 (Fed. Cir. 1984). Accordingly, it is deemed that the specification fails to provide adequate written description for the genus "neutralizer" and does not reasonably convey to one skilled in the relevant art the inventor(s), at the time the application was filed has possession of the entire scope of the invention drawn to "a composition for enhancing the rate of mammalian skin exfoliation… wherein the carrier includes tetra sodium EDTA and at least one neutralizer".

8. The following is a quotation of the second paragraph of 35 U.S.C. 112:

> The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

9. Claims 1, 3 and 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

10. The expression "neutralizer" is without metes and bounds. Additionally a neutralizer is added to neutralize e the acid. There is no acid in table 5.
